

NEW ENGLAND ROPES

est. 1967

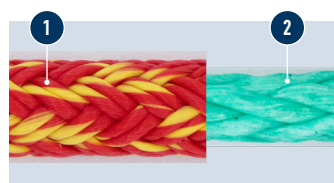

PERFECT FOR
CONTROL LINES

NEW! FLIGHT LINE

DESCRIPTION

Flight Line is a strong, lightweight, flexible, low-stretch line with a braided core that is easily tapered. It's soft on the hands and gets even softer with use. It will certainly take-off with its lightweight, non-absorbent xlf cover and its 100% braided Dyneema® core. In NEW colors for 2025!

MFP mottle cover combination of base color & yellow (and braided Dyneema® core). Extremely strong, lightweight, and easily tapered. Ideal for light air spinnaker sheets and dinghy/one design control lines. **Use the following color codes when ordering: X: 1=Red, 2=Green, 3=Blue, 9=Purple**

FEATURES

1. Cover: 24 carrier braided Polyester
2. Core: 12 - Strand Dyneema® SK78

APPLICATIONS

Spinnaker sheets, and dinghy and one design control lines
